THE PATRIOT GROUP

The Patriot Group is a nationwide, independently owned and operated utility services contractor founded in 2016 by a team of U.S. Military Veterans. Built to address critical gaps in the utility services space, The Patriot Group has quickly earned a reputation for delivering transparent, reliable, and results-driven solutions across diverse markets.

We offer turnkey 4PL services including laydown yard and warehouse management, materials handling, forecasting, procurement, and program and project management. Our expertise extends to all aspects of land identification, regulatory compliance, and logistics coordination—tailored to support complex infrastructure and utility projects nationwide.

The Patriot Group also maintains specialized teams in Fire Services, Disaster Response, and Traffic Control, alongside expanded capabilities in remote material handling and unloading, transportation, and transmission pole assembly. This allows us to deliver fully integrated field and logistics solutions for utilities, municipalities, and construction partners across the country.

Through strong alliances with leading materials manufacturers and national distributors, we help clients reduce total cost of ownership—not just product pricing—by streamlining operations, simplifying billing, and reducing vendor overlap.

As a signatory contractor with multiple IBEW locals nationwide, we can operate under union labor agreements and support workforce compliance wherever required.

Select Awards

The Patriot Group is honored to be recognized for the character and accomplishments of our team. We value the reputation we've earned.
